Katherine. Here's a pdf of a handout I received while working with schools in Pittsburgh. Pennsylvania several decades ago when performance assessment was big. It is geared toward school students and the Pennsylvania state standards. Part I is on design of the student performance and Part II is on the design of a rubric to assess (judge, score) the performance.

Although is geared toward school students, there may be enough for us to see how to adopt and design a rubric to assess AVP activities designed by inmates.
